### Minutes of Alumnus Talk

The Speaker Highlighted that “India being 2nd largest populated country having an endless potential for its growth and development doesn’t lack any resources in terms of human capital to grow in future. However, India is facing two major problems aside poverty which acts as a hurdle in its path of endless growth i.e. Unemployment and Underemployment. From the research done, it was found that the Government of India has done and is doing a lot to overcome these hurdles but due to various factors it is unable to do so.

These factors include High rate of Poverty, Low level of literacy rate, High rate of unemployment among educated people, Lack of awareness among people and low level of job opportunities available for the skilled people. Also, it was found that due to ever-rising competition the demand for more skilled workforce increased and as a result unemployed also increased. And it’s not that people don’t agree with these stated problems, From the survey that was conducted it was found that Majority of people believed that these problems are the root cause of unemployment.

Majority of people agreed to that —In order to make skill development successful in India, creating more job opportunities is necessary|. It was also found that, majority of people believe that skill India campaign would be successful and beneficial for them as well for the growth of country.
